20 years ago it all started with
the idea for the SEABOB.

Now into its third generation,
it is perfection.

The extraordinary F9 experience.
It will get you hooked.

The SEABOB F9 was
built to impress.

Not just with its low weight.
Also with its handling and design.

Design by Studio F. A. Porsche

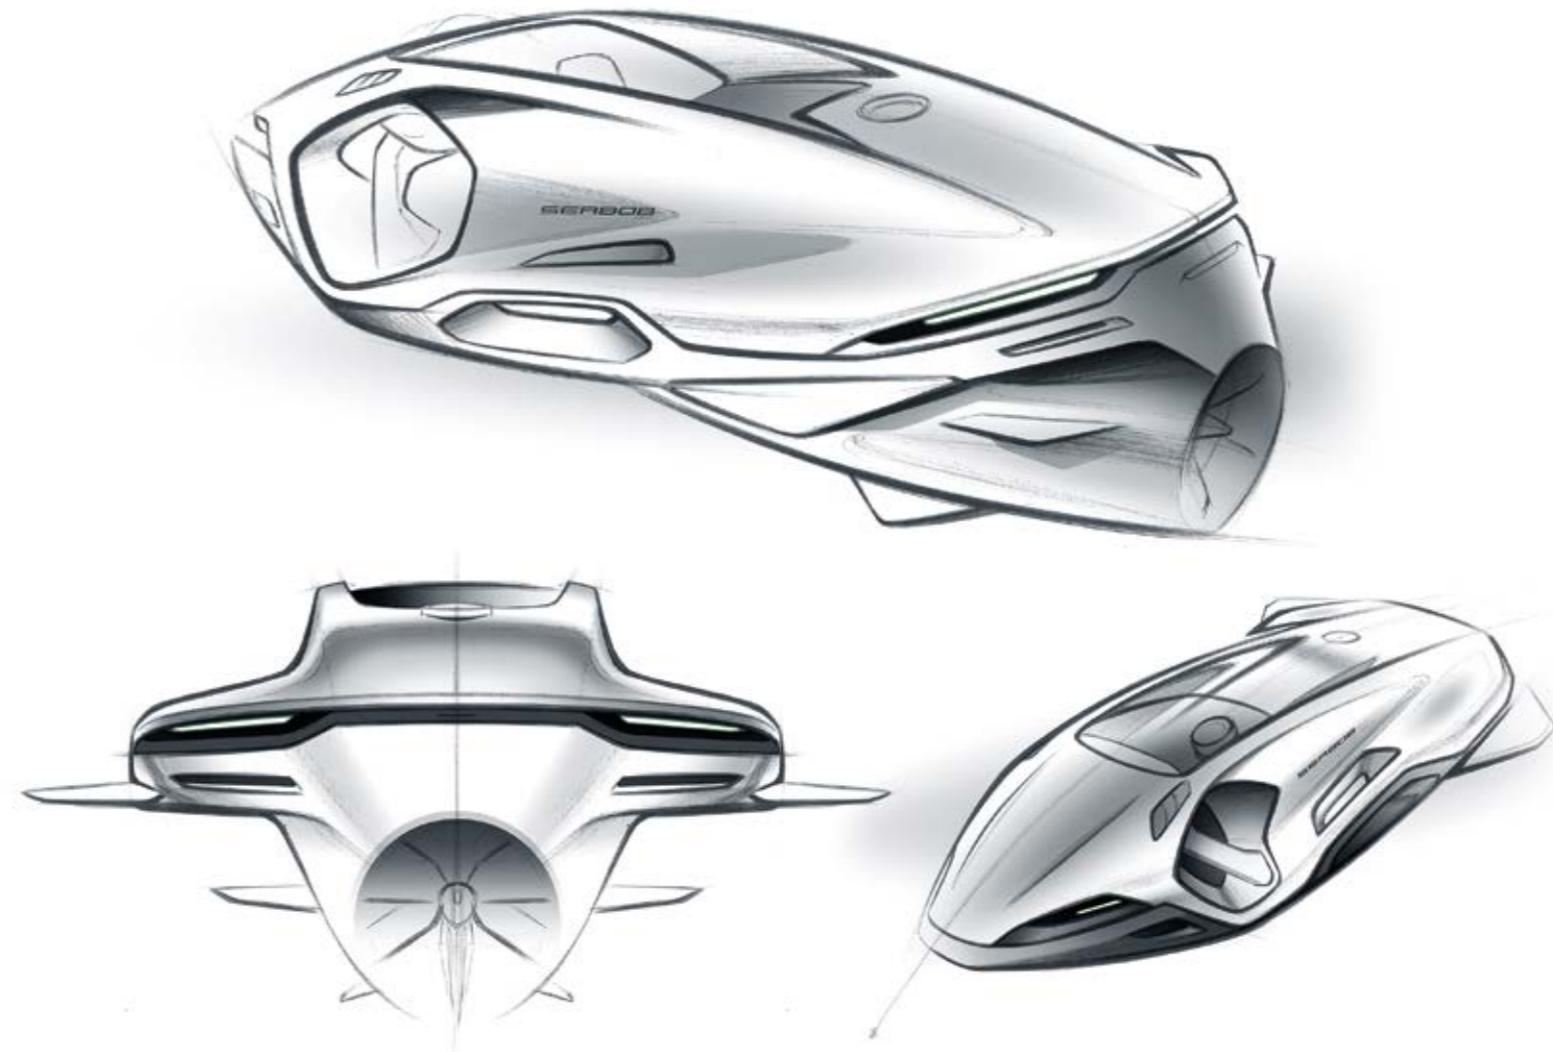

Henning Rieseler
Design Director Studio F. A. Porsche

Ferdinand Alexander Porsche
Designer of the iconic Porsche 911 sports car

For the designers at Studio F. A. Porsche, design is a symbiosis of form and function. This approach is what gave rise to the sporty and functional design lines of the SEABOB F9. The result is a watercraft that impresses with attractive puristic lines and exceptional sports handling.

Weight and performance.

The facts say it all.

With a total weight of just over 20 kg, the SEABOB F9 has everything you need for the dynamic thrill of driving in the water. The power is sure to impress. The SEABOB F9 series is equipped with everything you need to maximise your fun in the water. With a completely new vehicle concept, the new SEABOB F9 series captivates with its exceptionally light weight as well as its unprecedented agility in the water.

The SEABOB F9 series.

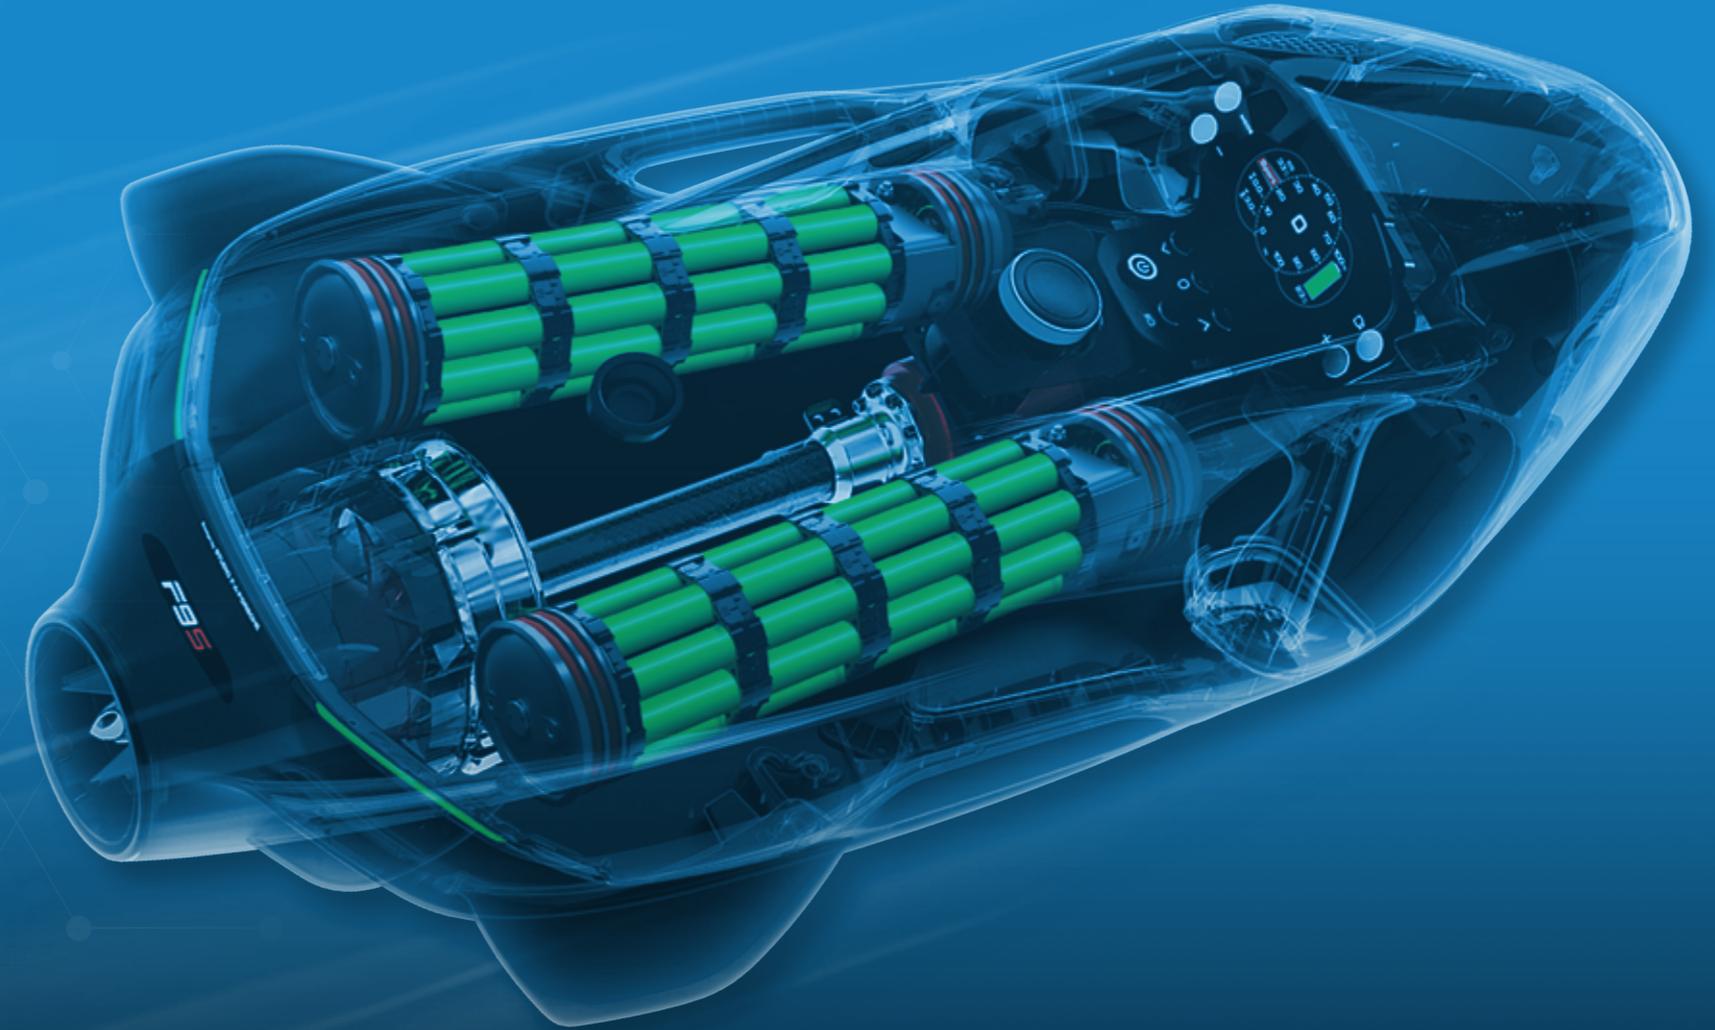

Reconceptualised from the ground up.

The combined driving performance along with the lighter weight of the new SEABOB F9 series are unparalleled. This ambition is made clear from the very glance. When it comes to our SEABOB JETS, the focus is not only on high speeds on and under the water, we simply want to provide a better experience and more excitement. After all, we already build the fastest scooter of this kind!

Cutting Edge Technology. Quality in every detail.

At first glance it is obvious that the new SEABOB F9 series is built on the SEABOB's perfectly engineered drive concept developed by us. A second glance reveals the extensive technical innovations that have flowed into the new series. We have once again developed a unique concept for a superior recreational watercraft with innovative technology protected by extensive

patent and intellectual property rights. Above all, it sets completely new quality standards. We have consistently enhanced our demands on quality for the SEABOB F9 with high-quality materials such as titanium, magnesium and special ceramic coatings. Our clear aim was to take a giant leap into the future with the new F9 SEABOB generation.

Radiance.
More than just the drive.

Special moments.
Enjoyed together.

Just immerse yourself.
A world of adventure awaits.

Driving Stability System. Have fun!

The newly developed and patented wing technology is behind the SEABOB's F9 S distinctive handling on the water, creating intense driving pleasure. The entire wing system mounted on the side of the SEABOB's F9 S Jet nozzle and the extractable rear

side wings work together to create highly stabilising buoyancy forces for all activities on the water. Experience the unique handling of the SEABOB F9 S Driving Stability System.

The experience.
That is ever-present.

The cockpit. Everything under control.

The SEABOB F9 boasts a digital thumb-operated accelerator. This is used to adjust the infinitely variable engine power to your needs. A switch sensor lets you switch between Normal and Dive mode. In Dive mode, the performance is much more sensitive for comfortable underwater travel.

For sports performance over the water, you simply activate the sensor switch for Sports mode. Sports mode generates maximum engine power at the flick of a switch. These technical features enhance the overall driving experience for unmatched enjoyment with the SEABOB.

SEABOB F9

Light and strong.

F9

Weighing just over 20 kg, the SEABOB F9 provides optimum handling. Built for versatile applications. The SEABOB F9 impresses with its phenomenal agility, even in smaller pool facilities.

SEABOB F9 S

The S symbolises pure sportiness.

F9S

The driving pleasure is indescribable. It's something that just needs to be experienced.

Serial Colours.

F9S

Designation	Technical description		
Energy	Total capacity	48V; 18 Ah; 0.8 kWh / 48V; 27 Ah; 1.2 kWh*	48V; 27 Ah; 1.2 kWh
Operating time	With a sporty driving style up to	40 min / 60 min*	50 min
Charging time	Standard charging approx.	4 h / 6 h*	6 h
	Quick charging approx.	1 h / 1.5 h*	1.5 h
Motor	Electrical power	2.6 kW	3.6 kW
Power	Thrust performance	60 TP	84 TP
Motor control	Electronic speed control	Stepless	Stepless
Diving depth	Safety cut-off by the built-in depth sensor at a water depth of	3.0 m (10 ft)	3.0 m (10 ft)
	Electronic control system can be set to maximum water depth of	30 m (98 ft)	30 m (98 ft)
Dimensions	L × W × H (in mm)	1,023 x 526 x 343	1,023 x 526 x 343
Weight	Approx.	20.9 kg (46 lbs) / 22.8 kg (50 lbs)*	23.9 kg (52 lbs)
Buoyancy in water	Approx.	10 kg (22 lbs) / 9 kg (20 lbs)*	8 kg (18 lbs)
Steering	By simply shifting body weight	•	•
Stopping	Releasing the trigger causes the water resistance to stop the SEABOB within an extremely short distance	•	•
Driving Stability System	Extractable stern stabilizer left and right and two foils on the lower body		•
Securing device	For Pilot belt system	•	•
Extras	Elements in a matt chrome design		•

* Battery capacity plus

Technical modifications and tolerances reserved.

Accessories.

SEABOB Weight.

For professional scuba diving with your SEABOB.

SEABOB Bag.

Carrier bag for on the way and when travelling.

Fast Charger.

For short charging times.

SEABOB Lifting Dock.

For lowering or raising the SEABOB with a crane system or use as a floating parking station.

Pilot belt system.

For sporty driving in the top speed range.

SEABOB Cover.

To protect the SEABOB from dust and sunlight.

Imprint.
